OFFROAD RIDER COLLECTION OFFROAD 2020

RACETECH GEAR

You can't control the heat – but you can beat it. The RACETECH JACKET is a lightweight jacket solution suited for warmer climates. Zip off sleeves, large cargo pockets and multi-adjustable draw-straps mean you stay comfortable, even if the temperature decides otherwise.

The lightweight and durable RACETECH PANTS is the ideal matching companion and with perforated ventilation zones also suited for warmer conditions. Elasticized panels in movement intensive areas ensure comfortable rides.

The materials used in the RACETECH GEAR are race-proven and have been tested during Rally Dakar.
